## **DETAILED ACTION**

### ***Drawings***

1. The drawings received on 4/21/04 are accepted.

### ***Allowable Subject Matter***

2. Claim 1 is allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is that there cannot be ascertained prior art that anticipates or makes obvious the provisions of "daily stress cycle...mammalian body activities" and "compressive creep model for a single stress cycle" in combination with the other limitations presented in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Koyama et al (4,768,383) disclose a method of predicting the remaining lifetime of a metal material.

Manahan et al (4,567,774) disclose a miniaturized bend test for determining mechanical behavior of solid materials using miniature specimens.

Nishida et al (6,810,748) disclose a method for evaluating creep lifetime.

Art Unit: 2855

Nishimura et al (4,907,457) disclose a method of evaluating the residual life of heat resistant steel.
